

Problem Statement 1:- QuickCourt - A Local Sports Booking

Overview

QuickCourt is a platform that enables sports enthusiasts to book local sports facilities (e.g., badminton courts, turf grounds, tennis tables) and create or join matches with others in their area. Your goal is to build a full-stack web application that facilitates this end-to-end experience, ensuring a smooth user experience, booking accuracy, and community engagement.

Roles

- 👤 User
 - 👤 Facility Owner
 - 👤 Admin
-

User Role

Features & Functionalities

Authentication

- Login with email and password
 - Sign up with email, password, full name, avatar, and role
 - OTP verification step after signup
-

Home Page

- Welcome banner or carousel
- Quick access to:
 - Popular venues
 - Popular sports

Venues Page

Venues Page

- ⦿ List of all approved sports venues
- ⦿ Search for a venue
- ⦿ Filters: sport type, price, venue type, rating
